

RMNEF
THE ROYAL MERCHANT NAVY EDUCATION FOUNDATION
rmnef.org.uk

Patron: HM The Queen
President: HRH The Duke of Edinburgh, KG, KT, OM

Today's Royal Merchant Navy Education Foundation started life in 1827 as The Merchants' Seamen's Orphan Asylum, which was tasked not only with providing board and lodging for the orphans of British Merchant Navy seamen but also, and pertinently, with sufficient education to enable them to obtain employment.

It is now a British national children's educational charity, which provides funding for the needy British children of Merchant Navy seafarers, professional sea-going fishermen and RNLI lifeboat crew members, who have served or are serving at sea and who are unable to meet their children's needs.

The Royal Merchant Navy Education Foundation
1a Charnham Lane, Hungerford, Berkshire RG17 0EY

DRAGON

As a consequence of war, there are many millions of landmines laid in the ground and further millions of tons of surplus munitions stockpiled around the world. These kill and maim and create a constant danger to the lives of innocent civilians.

By offering an eco-friendly and cost competitive range of products, together with innovative technologies, consultancy and training services, we can enable Non-Government Organisations, MoD's and commercial entities, to use low order techniques that are safe and less harmful to the environment. Disarmco continues to push the boundaries to provide safer cleaner solutions to munitions disposal.

Disarmco is a UK company that enables implementing agencies to safely remove munitions (land mines, unexploded ordnance (UXO), Explosive Remnants of War (ERW) and stockpiles of ammunition and projectiles) making the environment safe and secure, without the need to use damaging explosives. www.disarmco.com

THERM BRIGHT
PASSIVE THERMAL TECHNOLOGIES

ThermBright Unpowered Thermal Targets

There is a clear requirement for thermal targets to support training and development of combat forces. Conventional targets can often not be seen through T1 (thermal imager) systems. The versatility of the ThermBright range of targets can be used for all type of surveillance and target acquisition (STA) systems including image intensifiers (NVG), thermal imagers and the latest fusion technology.
